## SUMMARY

Motivated and detail-oriented Computer Science & Engineering student with practical experience in frontend development and building responsive web applications. Completed multiple internships and currently expanding backend knowledge to grow as a full-stack developer. Strong problem-solving and collaborative abilities.

## SKILLS

Java, CSS, HTML, JavaScript, React.JS, BootStrap, Data Analytics, Responsive Web Design, Tailwind CSS, Typescript, Git/GitHub

## INTERNSHIPS

### FireBlaze Technologies Pvt. Ltd., Intern

Feb 2025 - Present

- Built and maintained responsive web interfaces using HTML, CSS, JavaScript, Bootstrap, and React.js.
- Collaborated with the development team to implement clean, functional, and scalable frontend code for live projects.
- Assisted in integrating APIs and improving page performance across devices

### Dealintra Pvt. Ltd., Intern

June 2025- Present

- Collaborated with the frontend team to develop reusable UI components using React.js.
- Implemented responsive design principles to ensure seamless user experience across devices.
- Managed version control using GitHub, created feature branches, and actively participated in code reviews.

## PROJECTS

### Real Estate Admin Dashboard

June 2025- Present

**Role:** Frontend Developer | **Skills:** React.js, TypeScript, HTML,

- Developed a responsive admin dashboard for managing real estate properties and user transactions.
- Integrated APIs to dynamically display property listings, user profiles, and transaction data.
- Enhanced UI/UX consistency across multiple devices for a smooth and responsive user experience.

### Shopping Trends Analysis

**Role:** Data Analyst (Personal Project) | **Skills:** Python, Pandas, Matplotlib, Data Visualization

- Analyzed consumer shopping trends using Python to extract useful patterns from large datasets.
- Visualized shopping behaviors and seasonal patterns with clear graphs and detailed data charts.
- Delivered insights to support data-driven marketing and customer-centric decision-making.

### AI Virtual Mouse

**Role:** Developer (Personal Project) | **Skills:** Python, OpenCV, MediaPipe, Computer Vision

- Created a virtual mouse using hand gestures to enable smooth, touchless system navigation.
- Implemented real-time gesture tracking for cursor movement, click, and drag functionalities.
- Improved system accessibility with a gesture-based input method for seamless control.

### Personal Portfolio Website

**Role:** Frontend Developer | **Skills:** React.js, Bootstrap, HTML, CSS, JavaScript

- Built a responsive portfolio using React.js to showcase personal projects and development skills.
- Integrated light/dark mode toggle and smooth navigation for enhanced user experience.
- Displayed project highlights and a contact form with clean, modern design.

## EDUCATION

### B-Tech in Computer Science & Engineering

2022- Present

Anjuman College of Engineering & Technology
